Arduino IDE 2.3.6

[Release notes](#)

The new major release of the Arduino IDE is faster and even more powerful! In addition to a more modern editor and a more responsive interface it features autocompletion, code navigation, and even a live debugger. For more details, check the [Arduino IDE 2.0 documentation](#).

Windows Win 10 or newer (64-bit)

Note: The website may prompt you with the choice for a donation; you can just continue with the option Just Download.

2 Windows Installation

- When downloading, if the browser asks for it, select the download folder (if you don't know where the folder is, press Win+R and type C:\Users\[username]\Downloads, replacing [username] with your Windows username). Then open the executable file.

Name	Date modified	Type
▼ Today (5)		
arduino-ide_2.3.6_Windows_64bit (1).exe	04/09/2025 21:53	Application

Figure 2b: Opening the Arduino IDE installer executable.

- The installation procedure will start. The first thing to do is accept the terms & conditions by clicking on **I Agree**.

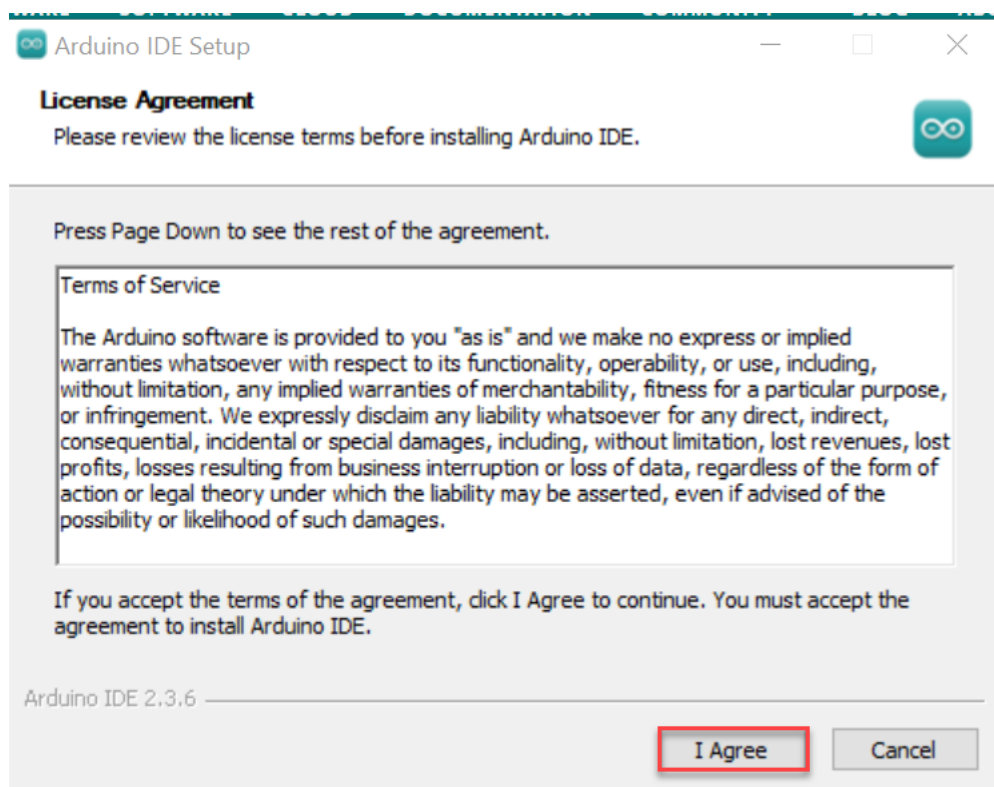

Figure 3: Accepting terms and conditions.

2. Select for which users you want to install the application (you can leave the default option if you don't have a particular preference) and click on **Next**.

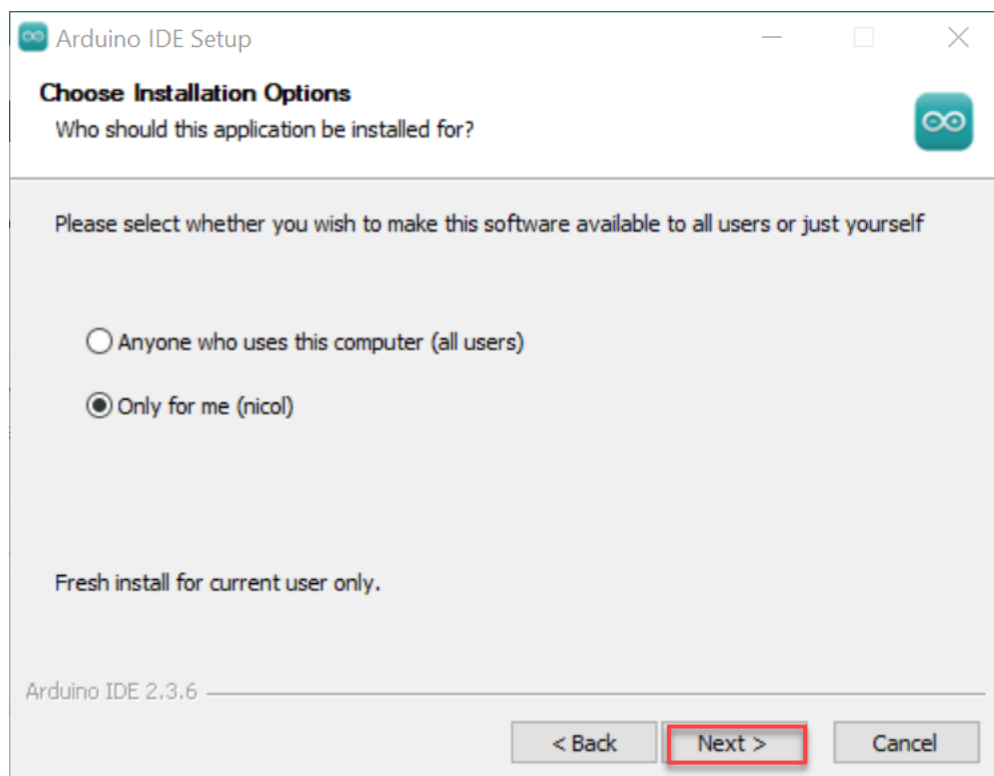

Figure 4: Selecting users for installation.

4. The installer will let you choose the installation path. If you're unsure, keep the default one. Click on **Install** and wait for the installation to finish.

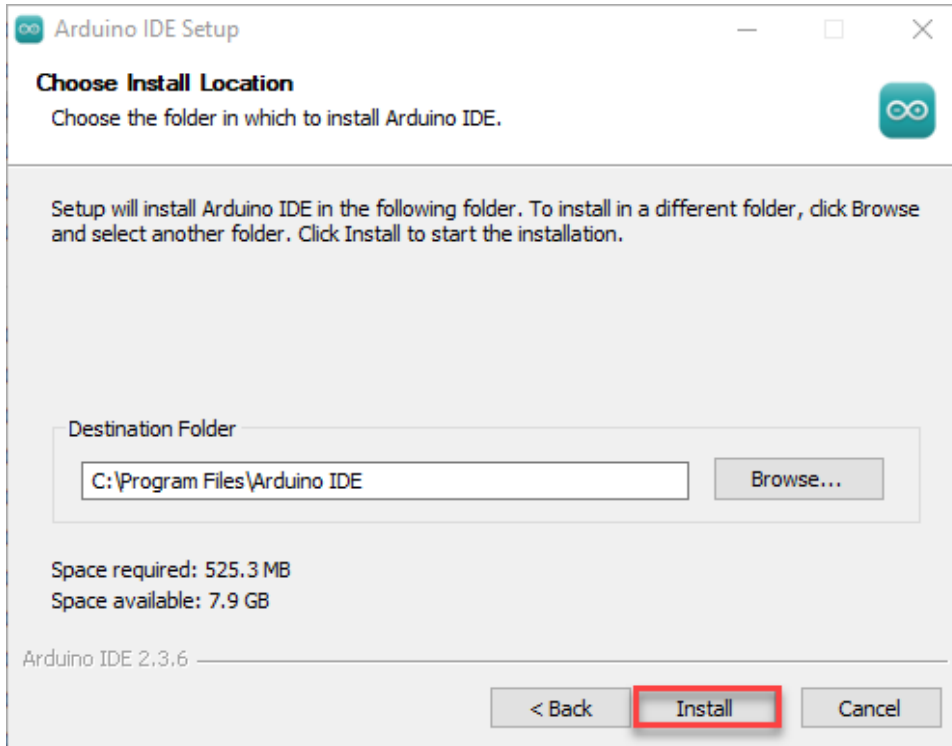

Figure 5: Choosing the installation path.

5. If prompted with a security message, continue by pressing the **Allow** Access button.

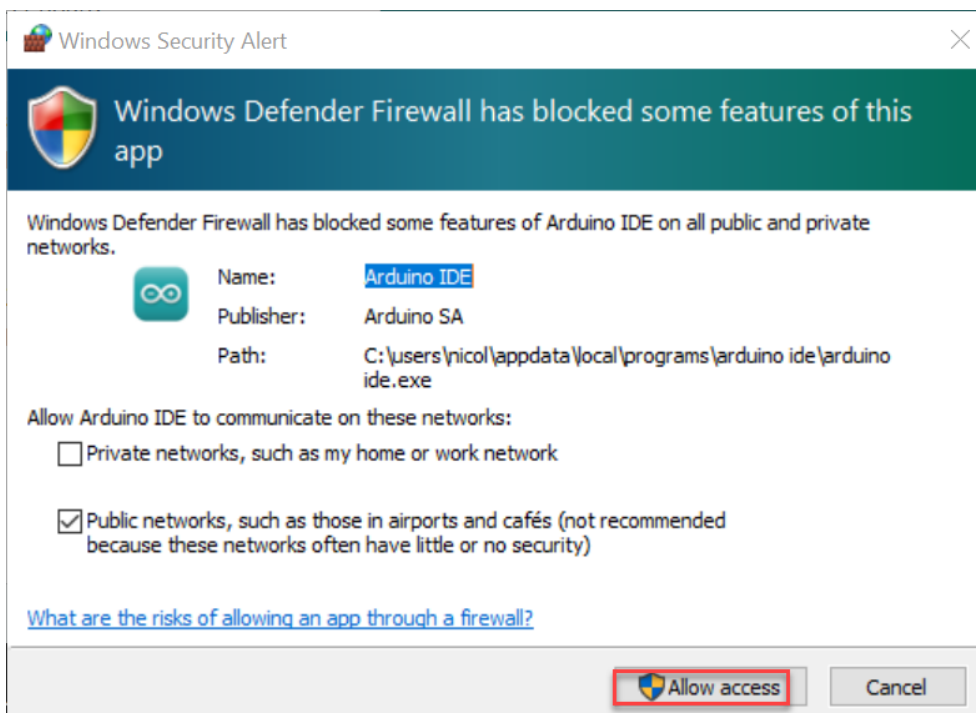

Figure 6: Windows security installation prompt.

6. When the installation completes, click Finish. If you want to run the Arduino IDE immediately, tick the checkbox before clicking **Finish**.

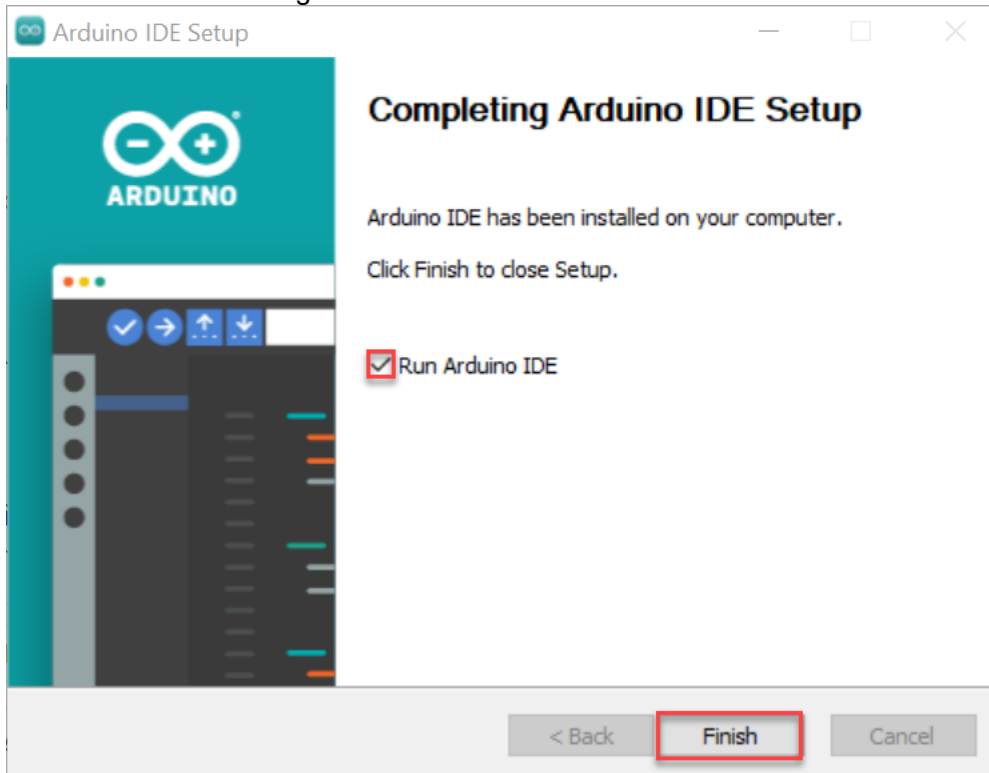

Figure 7: Completing installation (Finish screen).

7. A shortcut for the Arduino IDE should now be on your desktop. You can launch the IDE by clicking this shortcut.

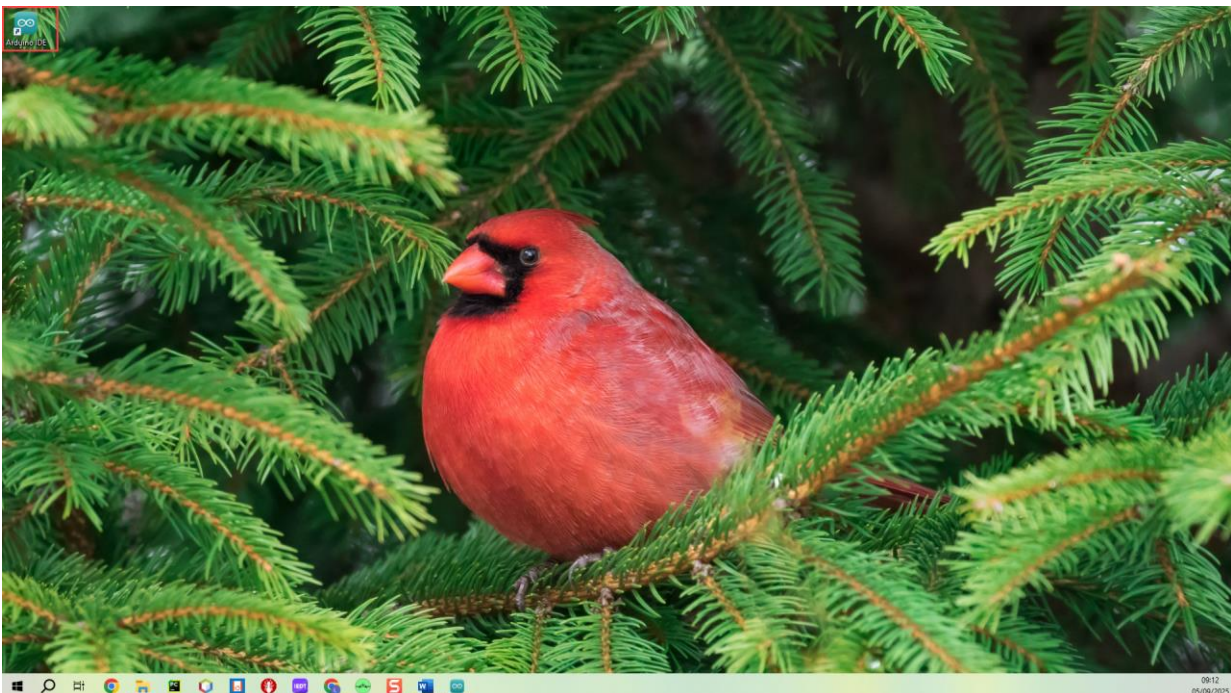

Figure 8a: Desktop Shortcut example

The launched IDE should look like the below.
